

Prathmesh Nitin Gite

Corvallis, OR | prathmesh.gite4@gmail.com | 541-286-0596 | linkedin.com/in/prathmesh-gite | png5042.github.io

PROFESSIONAL SUMMARY

Computer Science graduate with an Applied AI focus and hands-on experience building end-to-end ML pipelines, automation tooling, and full-stack applications. Track record of shipping production-quality Python tooling and structured engineering processes.

EDUCATION

Oregon State University

International Honors B.S. in Computer Science, Applied AI Focus.

Corvallis, OR

2026

SKILLS

Languages: Python, C, C++, Java, SQL, HTML

ML & Data: scikit-learn, PySINDy, pandas, NumPy, ML pipeline development

Tools & Platforms: Git, Docker, REST APIs, Tableau, QuickSight, MicroStrategy, Microsoft Power BI

PROJECTS

Sparse Identification of Nonlinear Dynamic Systems

Fall 2025 – Spring 2026

<https://github.com/PNG5042/Sparse-Identification-of-Nonlinear-Dynamic-Systems>

Oregon State University

- Built an end-to-end ML pipeline predicting high-temperature rupture behavior of Alloy 617 and SS316H using sparse regression and Larson-Miller modeling.
- Recovered specimen records across inconsistent formats (900°C, 1173K, 100MPa, 14.5ksi) using a data-ingestion pipeline with cascading fallback parsing logic.
- Implemented PySINDy sparse regression to discover the symbolic stress-LMP relationship, automating C-parameter selection via grid search with 5-fold cross-validation.
- Stack: Python, PySINDy, scikit-learn, pandas, NumPy, matplotlib, openpyxl

Spryntax <https://github.com/peytonju/team-5-spryntax>

Jan 2025 – Mar 2025

Oregon State University

- Built the core typing-practice interface in JavaScript, capturing user keystrokes in real time and displaying post-session accuracy and WPM stats.
- Contributed frontend work within a microservices architecture, coordinating with backend teammates on API contracts across services for user stats, leaderboards, and favorites.
- Gained exposure to a CircleCI CI/CD pipeline and Mocha-based test automation as one of two Frontend Developers on a 7-engineer MVC team.

EXPERIENCE

IT Service Desk

Sep 2022 – Present

Oregon State University

- Developed Python automation scripts that triaged and categorized 50+ support tickets per week, eliminating manual routing effort and accelerating resolution across the team.
- Designed structured data-logging processes and coordinated with senior engineers to improve workflow consistency across a 200+ user department.
- Authored debugging documentation that became the standard root-cause reference, reducing recurring software issues across the support team.

Math Tutor / College of Science Learning Assistant

Sep 2022 – Mar 2023

Oregon State University

- Designed structured problem-solving sessions for 20+ weekly students, applying iterative feedback to break down complex mathematical and computational concepts.

Software Engineering Intern

Apr 2020 – May 2020

ESDS Software Solution Pvt. Ltd.

- Designed and deployed a web-based data-retrieval tool adopted by 70 users, saving the organization more than 100 hours by replacing a previously manual workflow.
- Authored technical specifications translating system requirements into developer guidelines, standardizing implementation across engineering and product teams.

Engineering Intern

Oct 2018 – Dec 2019

Aura Opto Electronics Pvt. Ltd.

- Partnered with the engineering team to identify process inefficiencies and prototype optimized workflows, contributing to a 5% production output improvement.
